CPYRGHT

The Mightiest Espionage Machine of the World

A few days after American troops marched into Cambodia, the head of the AID in a television interview disclosed that the CIA was using the developed aid agency as a cover in carrying out its own operations in Laos.

Countless stories, rumors, and disclosures have been making the rounds all over the world for decades about the official espionage organization of the United States and about its power, influence, and activities. It is anything but a secret that it employs all imaginable legal and illegal means and covers. At any rate, it was something new when it was learned that the head of an agency, which is respected everywhere and which magnanimously helps underdeveloped countries, openly admitted that this agency was being exploited by the CIA for
